# Iguana

They can “drop”  
their tail if caught,  
like a magic trick  
to escape.

Iguanas can swim!  
And they’re pretty good at it, too.

# Jellyfish

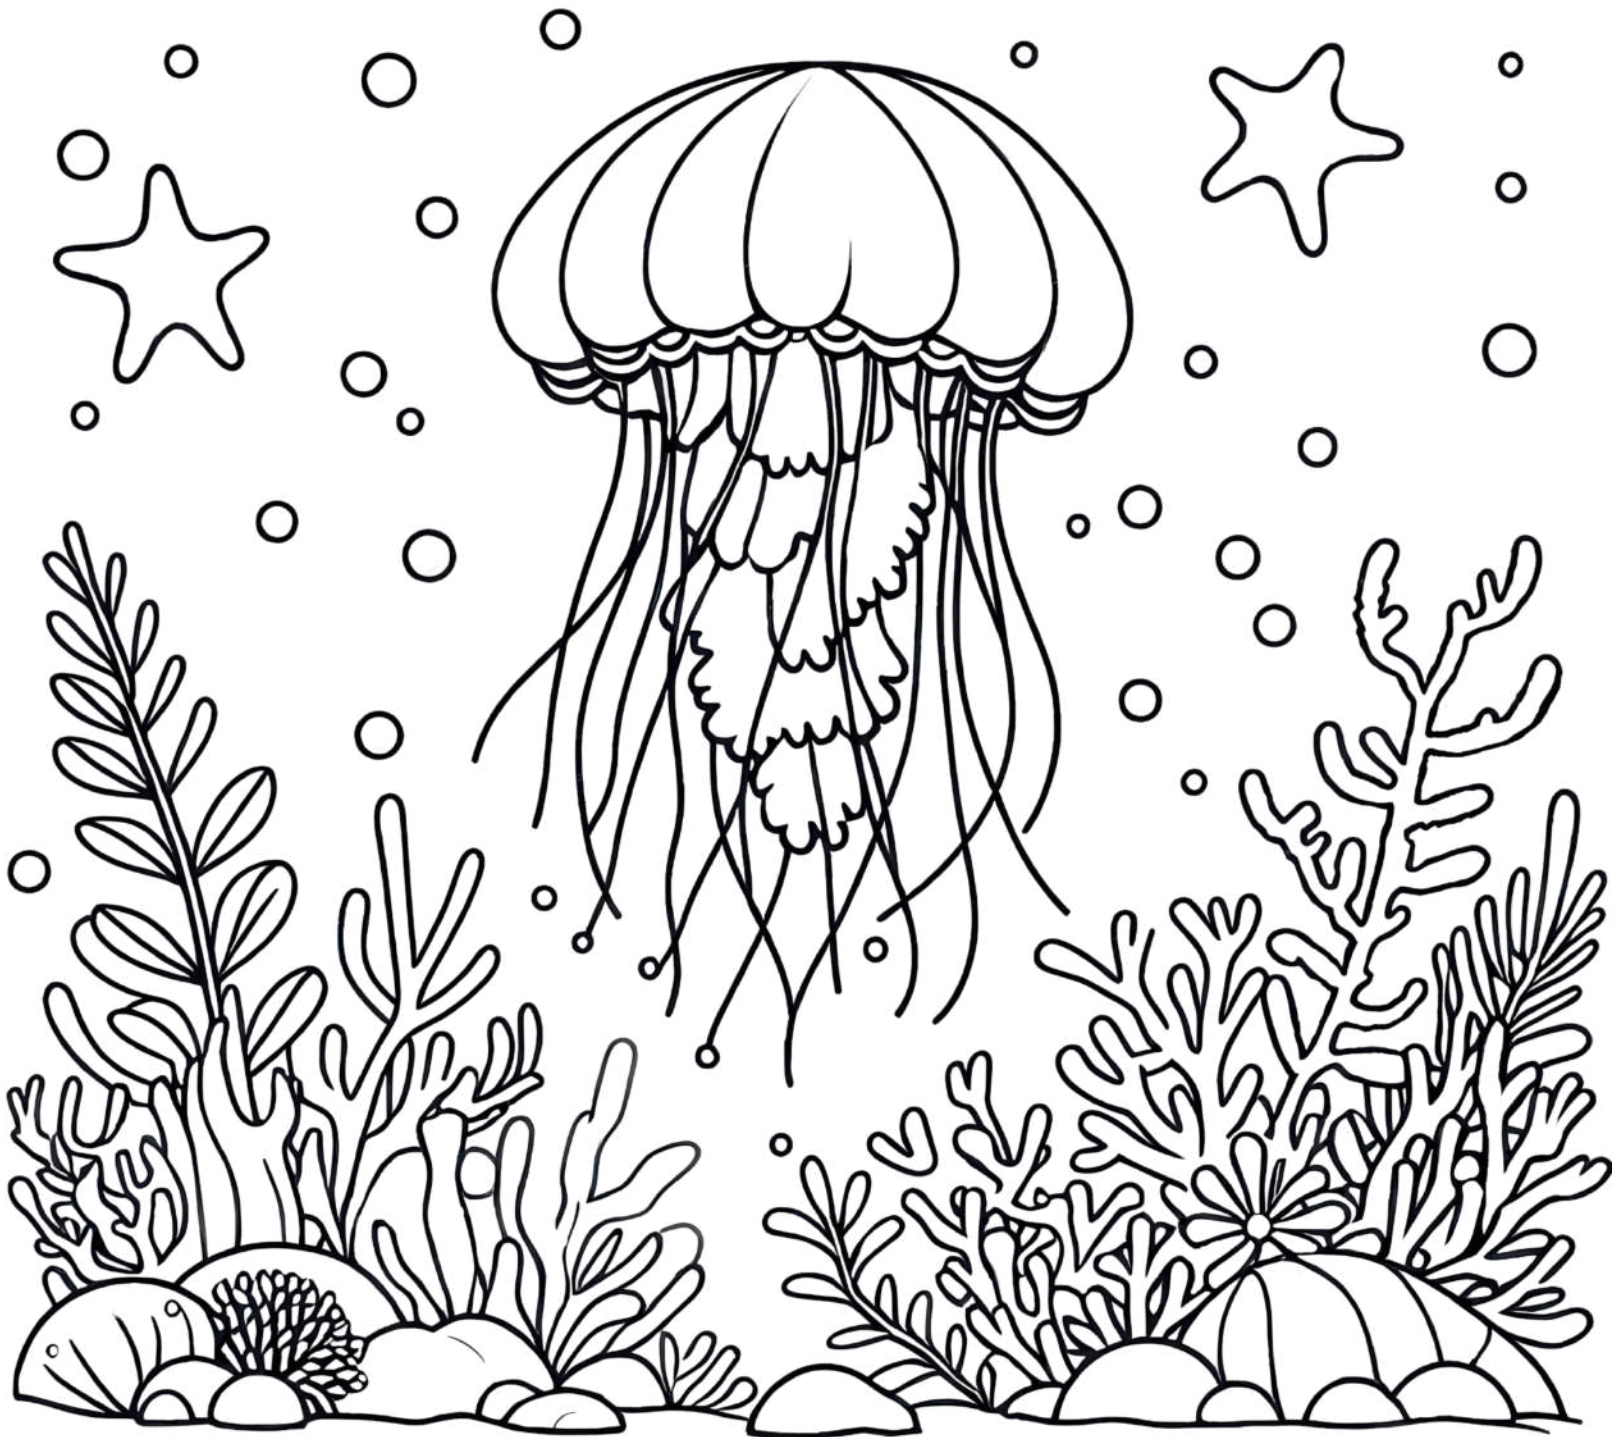

Some jellyfish are immortal—nature's forever friends.

Jellyfish have been around longer than dinosaurs! Talk about ancient history.

# Nightingale

Nightingales sing over  
1,000 different songs!  
They're like nature's  
jukebox.

Their night-time  
concerts earned  
them the name  
“night singers.”
